Switzerland, Staad, 25th April 2019

Maritime Aerospace opens additional Facility at Zurich International Airport

Maritime Aerospace established a new and additional Cabin Interior Facility in Hangar 2 of Zurich International Airport (ZRH).

The **new interior shop** operating under the **EASA Part 145 Approval (C6)** is equipped with full **scale cabin upholstery capability** and in addition is set up for **cabin interior paint work**. National and International Airlines operating from ZRH Airport benefit from the new on site capability and are supported with cabin upholstery work, **partly and complete carpet replacements** and innovative **surface repair technologies** for their Economy, Business and First Class sections. The onsite capabilities are provided without limitations and for every aircraft type.
